Dates of interview if necessary: to be communicated

Successful applicants will be notified on **31<sup>st</sup> July 2018 latest.**

**Abstract**

**Fellowship in Minimally Invasive Surgery at the University of Rwanda**

Developed and carried out in close collaboration with the Rwandan Ministry of Health, this ARES-PFS aims to create a Fellowship in Minimally Invasive Surgery at the University of Rwanda to improve the training of operating theater professionals in Rwanda and the sub-region. The intervention strategy is articulated on effective and sustainable north-south and south-south technology transfer, and on the unconditional support of the Kigali authorities and Medtronic, the project private partner.
